Election/Restrictions

Inventions 1, 2 and 3 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. In regards to inventions 1 and 2 they are not capable of use together and have different functions. Invention 1 and Invention 2 are not capable of use together because they have different effects, while Invention 1 sorts based on article type or weight into batches, Invention 2 sorts based on historical frequency distribution into batches, in which means are need to establish a historical frequency distribution. Invention 1 and Invention 3 are not capable of use together because they have different effects, while Invention 1 sorts simply based on article type

or article weight into batches, Invention 3 sorts based on performing a suitability analysis based on factual weight distribution on which it determines the best batch for the article, in which an individual weigher is necessary.

Invention 1 – a system and method of accumulating articles into batches and sorting based on article type or article weight, drawn to claims 1-10, 42-51

Invention 2 – a system and method of accumulating articles into batches and sorting based on a historical frequency distribution, drawn to claims 11-39

Invention 3 – A system and method for accumulating articles into plural batches and sorting based on a suitability analysis, drawn to claims 40-41

The claims are deemed to correspond to the following Inventions as listed above in the following manner:
